PERGOLAS

PER 01

PER 02

Wooden pergolas appeared for the first time in ancient Rome. If you translate the word pergola, it will mean an extension and its main purpose was to support abundant fruiting vine, and later pergolas were used as a kind of open gazebo for relaxing.

In the Renaissance fashion pergolas spread throughout Europe. Any garden or park is not complete now without these exquisite green tents. Today, the main function of pergola is in creation of beautiful living corridor around the garden

GAZEBOS

Gazebos are a great place to retreat to on hot summer days, as the open design allows the breeze to flow through and the roof provides plenty of cooling shade.

For this reason they are popular in warm and sunny climates as an outdoor entertaining area.

Typically they are not attached to the house, instead standing alone in a large garden or backyard. In addition to being freestanding, gazebos are typically roofed, although some may have the structure of a roof without any of the shingles. The kinds of gazebos you'll see most often are large enough to seat four to six people

ALTHOUGH GAZEBOS

come in much larger sizes—some are large enough to serve as band stands! If you enjoy having a good time with friends and family in your backyard, a gazebo will serve as an excellent option. With features such as providing shade and protection from insects etc. a gazebo protects you from rain and provides shade.

TREE HOUSES

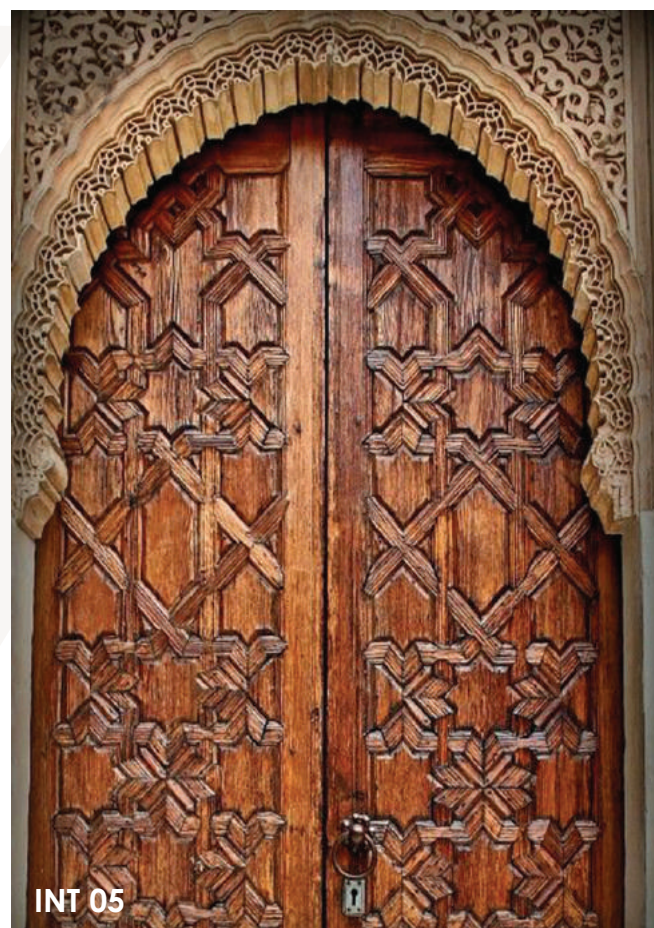

Treehouse is an urban hideaway for effortlessly chic people of taste. With its rich Renaissance décor, lush furnishings and ornate trees, the decadent rooftop lounge is styled as a house turned inside out.

Equally, a treehouse can be a place of relaxation and escape. Who doesn't like a fascinating tree house out in the garden behind the house, where the cares of the world are left behind.

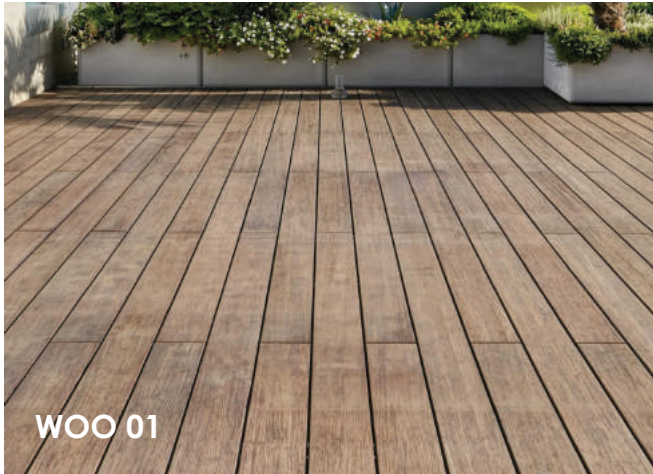

Where you can sit back and enjoy many special moments with the family, friends and children? For most of us, treehouses are a great reminder of all those moments that we spent as a child playing
